

New DPF? First: Know Your Ceramics

Every DPF has a ceramic core - but not all ceramics are the same.

Cordierite and **Silicon-Carbide** perform differently depending on the duty cycle.

So we offer both - letting you fit your truck with the right filter for the job.

Both compliant with industry standards, & our proprietary catalytic coating included.

For regular applications and long-haul operations, choose **Cordierite**.

For urban and demanding duty cycles, choose **Silicon-Carbide**.

✓
**Lightweight
& Cost-efficient**

✓
**OEM's
1st choice**

✓
**Tougher
durability**

✓
**Extended
soot capacity**
