

Now Live: December 2025 Upgrade

Christmas eve comes early, as we've just released 3 new features in the Dinex Partner Portal, to give you more transparency, more data and better search options.

All You Need From Turbo To Tailpipe

AFTERMARKET

New features, available now:

Full Transactional Visibility

The invoice and credit note overview now includes orders placed outside the Partner Portal, so you can find everything in one place. See it now in the "Invoice" section.

Improved Cross-Reference Download

Transferring our extensive library of cross-references to your own ERP or PIM system just got a whole lot easier with our new export function. Try it out now in the Data Exports section.

Stronger Search Hierachy

We've rebuilt the ranking logic behind our search engine to make sure you always see the most relevant matches first, making it easier and faster for you to find just what you need!

Coming Soon!

Stay tuned, as the next Partner Portal upgrade is already in the making. Look forward to new features such as:

- ✓ The all exclusive and localized Dinex Academy.
- ✓ Complete PLC (Product Life Cycle) integration.
- ✓ More language layers, such as Canadian French and Mexican Spanish
